Summary

Relentless and disciplined college student with a focus on AI/ML, Cybersecurity, and Full Stack Development. Committed to pushing mental and physical limits, with a machine-like work ethic and a dedication to delivering high-quality, efficient results in every project. Adept at combining technical expertise with creativity to produce impactful solutions.

Technical Skills

• Programming Languages: Python, C++, JavaScript, HTML, CSS • Frameworks & Tools: MERN Stack (MongoDB, Express, React, Node.js) • Other: Assembly, OS Development, GIS, Computer Networks •

Focus Areas:

AI/ML, Cybersecurity, Full Stack Development

Education

Bachelor's Degree in Computer Science (In Progress) Institution: HiLCoE School of computer science and technology

Relevant Coursework: Web Design & Development, Geographic Information Systems, Computer Networks,

Statistics & Probability

Projects

• Full-Stack Web Application – Built a high-quality MERN stack application inspired by the design level of Meta/X.

• OS Development – Currently developing a custom operating system using Assembly and C++.

•Interactive Clash of Clans-Themed Website – Designed UI with advanced visual interactions beyond typical modern web standards.

• ASCII FPS Game – Developed a C++ game using ASCII rendering for creative constraints and fun experimentation
